## **BCM Resources: More Than Doubles Mineral Claims Area at the Shan Molybdenum Discovery**

BCM Resources Corporation (TSX-V: B) has staked an additional 11,300 acres of mineral claims adjacent to its Shan Molybdenum discovery located 20 km. northeast of Terrace B.C. This increases the total area of BCM's 100% owned claims in the Shan region to 18,790 acres.

The ongoing success of the company's diamond drill program and analysis of both historical data and recent BC government geological surveys prompted the companies VP of Exploration; Dr. Margaret Venable, to recommend the acquisition of this additional land package. These new claims border the northern ridge of the Shan property and run to the northwest for five kilometers. (See Company's website for Map.)
