BCM Resources Corporation: Resignation of Director

Vancouver, BC - BCM Resources Corporation (TSX-V: B), the "Company" announces the resignation of director Lindsay Bottomer effective May 11, 2012.

"On behalf of the Company's management and Board of Directors, we thank Mr. Bottomer for his valuable contribution and wish him the best in his future endeavors" stated Mr. Dale McClanaghan, President of BCM Resources.

The Company looks forward to further exploration work at its 100% owned exploration properties with a focus on expanding the molybdenum discovery at its flagship Shan South property situated some 20 kilometers northeast of Terrace, B.C.

The Company has completed four drill programs at Shan South since 2006. Drilling to date consists of 13,624 meters in 57 holes. Significant mineralized intercepts of molybdenum (Mo) have been encountered within the Las Margaritas zone in all four phases of drilling. The program completed in the summer 2011 included 16 holes of which seven were directed to further defining the Las Margaritas deposit. These holes intersected the molybdenum-bearing zone, returning significant intervals of 0.06% Mo or greater. Four of these holes also contained sections grading 0.10% Mo or greater.

The Company plans to conduct preliminary metallurgical test work on sample rejects from the drill core recovered in 2011. The Shan South property is fully permitted and further drilling will include an additional 10 holes within the Las Margaritas zone. The company anticipates that these drill holes should provide enough information to prepare a preliminary Ni 43-101 compliant resource estimate.

About BCM Resources Corporation

BCM Resources Corp. is a Vancouver-based mineral exploration company, dedicated to advancing its Shan South molybdenum discovery. The Company is also the holder of a significant land package of 100% owned mineral claims comprising another five properties near Terrace, B.C. All of these are considered to be highly prospective for molybdenum and other base & precious metals.
