

BCM Resources Corporation Financing Update

Proceeds to Drill Greenfield Porphyry Cu-Au-Mo Discovery at Thompson Knolls Project in Utah, USA

Vancouver, BC, March 18, 2021 - BCM Resources Corporation (TSX-V: B), announces the closing date of the Non-Brokered private placement financing announced in a News Release January 19, 2021 has been extended to March 28, 2021. The Placement is priced at \$0.055 per unit. As noted in the January news release, proceeds will be up to C\$715,000 through the issuance of up to 13,000,000 units ("Units") priced at C\$0.055 per Unit. Each Unit is comprised of one common share of the Company (a "Share") and one share purchase warrant (a "Warrant"). Each whole Warrant entitles the holder to purchase one common share of the Company at a price of C\$0.10 for two years from the date of issue.

About BCM Resources Corporation

BCM Resources Corporation is a diversified Canadian mineral exploration company now focused on completing Phase 1 discovery drilling of the Thompson Knolls property, its key asset. BCM also controls prospective Copper, Gold, and Molybdenum exploration projects in British Columbia. BCM Resources is managed by experienced and successful board members and advisors. Caution Concerning Forward-Looking Statements:

This news release and related texts and images on BCM Resource Corporation's website contain certain "forward-looking statements" including, but not limited to, statements relating to interpretation of mineralization potential, drilling and assay results, future exploration work, and the anticipated

results of this work. Forward-looking statements are statements that are not historical facts and are subject to a variety of risks and uncertainties which could cause actual events or results to differ materially from those reflected in the forward-looking statements, including, without limitation: risks related to fluctuations in metals prices; uncertainties related to raising sufficient financing to fund the planned work in a timely manner and on acceptable terms; changes in planned work resulting from weather, logistical, technical, governmental, social, or other factors; the possibility that results of work will not fulfill expectations and realize the perceived potential of the company's projects; uncertainties involved in the interpretation of sampling and drilling results and other tests; the possibility that required permits and access agreements may not be obtained in a timely manner; risk of accidents, equipment breakdowns or other unanticipated difficulties or interruptions, and; the possibility of cost overruns or unanticipated expenses in these exploration programs.
