

## **BCM Resources Corp Receives DOGM Approval for 3 New Diamond Drill Holes**

**Vancouver, BC, February 17, 2022** – BCM Resources Corp is pleased to inform shareholders that the company has received approval from the Utah Department of Oil, Gas, and Mining (DOGM) for an additional 3 Diamond Drill Holes.

President Dr. Sergei Diakov stated, *“We are very excited about the mineralised porphyry we are drilling, drill hole TK3a is currently at a depth of ~1,040 metres and will continue to permit depth of 1,100 metres with ~460 metres of mineralisation. We will continue aggressively drilling this mineralised porphyry with these newly permitted drill holes. I want to also highlight that work on a “Plan of Operation” is underway which will allow us to significantly expand the number of drill holes and add more drill rigs.”*

These holes are in the Northwestern flank of the project. Diamond drillhole (DDH) TK5 is ~ 500 metres northwest of TK3a, DDH TK13 is ~500 metres North (and slightly West) of TK3a, and DDH TK14 is ~700 metres South (and slightly East) of TK3a. See map outline of new DDH locations on the company website; <https://bcmresources.com/investors/presentations/>

TK is located approximately 225 Kms southwest of Rio Tinto’s giant Bingham Canyon porphyry copper-molybdenum-gold mine and smelter complex near Salt Lake City, Utah.

The Company’s Director, Mr. Richard R. Redfern, M.Sc., and Certified Professional Geologist, a 'qualified person' for the purposes of National Instrument 43-101, has verified and approved the information contained in this news release.

### **About BCM Resources Corporation**

BCM Resources Corporation is a diversified Canadian mineral exploration company focused on continued exploration of the Thompson Knolls Porphyry Cu-Au-Mo project. BCM also controls prospective Copper, Gold, and Molybdenum exploration projects in British Columbia. BCM Resources is managed by experienced and successful board members and advisors.
